EXPERIENCE

Google Cloud

Building out various networks and virtual machines for my personal projects. Deploy applications to Google Cloud via Terraform and Ansible.

Networking

Understand networking topologies, configuring networks for small to medium businesses. Have a strong understanding of IPv4 and modest understanding of IPv6.

Infrastructure As Code (IAC)

Deploy various resources such as DNS, VM's, Storage, etc. to Google Cloud and AWS via Terraform and Ansible.

Programming

Builds projects in C/C++ and C# using Bazel, CMake and Visual Studio.

Home Lab

Build up a collection of 5 home servers where I tinker with networking, VPN's, relational databases, Docker containers, etc.

EDUCATION

Brakpan Technical High School, Brakpan — Grade 9

Finished school early to help support my family.

SKILLS

Git

Sprint Methodology

Google Cloud VM's

Google Cloud Networking

Google Cloud DNS

Google Cloud Artifacts

Google Cloud Storage

NameCheap DNS

Linux (Debian/Ubuntu)

C/C++ Programming

C# Programming

Python

Visual Studio

Bazel

CMake

Terraform

Ansible

Nginx

Debian Packaging

LANGUAGES

Fluent in English & Afrikaans
